RE: CLARIFICATION OF ZETDC/DOM/64/2023: SUPPLY AND DELIVERY OF PROTECTIVE CLOTHING

Query 1: *Whether we are required to provide two (2) samples (Navy Blue and Jungle Green Work suits Samples).*

Response 1: One sample (dark green) to be provided for acid proof work suit.

Query 2: *Navy Blue work suits traditionally have both Flame Retardant and Acid Proofing attributes while Jungle Green work suits would only have acid proofing attributes. Kindly clarify if this would be the case (navy blue with the 2 attributes and jungle green with the one attribute as described) or both colors are required with just the acid proofing attributes.*

Response 2: The work suits should have Acid proof attributes.

Query 3: *Kindly clarify quantities required on the navy blue and the olive green work suits.*

Response 3: Quantities are shown on Lot C page 15 of the Standard Bidding Document (SBD) for the Acid Proof work suits.

Query 4: *It would be helpful to provide the size Chart.*

Response 4: The sizes are shown in the Lots from page 13 to page 22 of the Standard Bidding Document (SBD).

Query 5: *Kindly confirm whether the ladies safety shoes needs to have either a steel or APT midsole (Lot J)*

Response 5: Ladies safety shoes need to have APT midsole.

Yours faithfully,

F. NYAMAKAMBO
SUPPLY CHAIN MANAGER
